

C3-D & C3-P

Circuit Continuity Check

Mechanical	
Size	1.375" Diam x 0.70" Deep (3.5cm Diam x 1.8cm Deep)
Weight	2 oz. (.05kg)
Color	Black
Hardware	SS 'D' Ring
Case Features	Waterproof, Impact Resistant, Rugged Compact design, No Switch Quick On
Power Source	Internal, Long Life
Electrical	
Range	0 - 4,999 Ohms
Test Signal Voltage	1.8 V
Test Signal Current	250 uA
Electronics	Internally Fused
Connection	Quick Press Binding Posts
Display	High Intensity LED
On State	Only 'On' when Circuit Present

To Operate:

Press and hold both ends of the blasting circuit to the terminals located just below center on the sides of the C3 device. When a circuit is present, the LED will turn on indicating the presence of a circuit. No resistance is measured. The LED only indicates continuity on the attached blasting circuit.

When finished reading continuity, remove blasting circuit ends from the terminals. Unit will power down automatically.

To preserve battery life, insure that the unit is not stored with loose conductive material.

NEVER use the C3 to measure voltage or current. The C3 ONLY indicates continuity.

Never use a damaged or questionable unit. EIT Corporation repairs all units which it produces.
