

## A Trusted Advisor

With the launch of the MacLean MDA-10 rock drill 2021 started off on the right foot. With projects all across North America, in locations where high explosives just are not viable, we have been able to provide complete solutions. When a project comes across your desk containing rock excavation, we are a trusted resource in your corner. Many customers rely on us to prepare for these jobs, to provide estimates and to supply take-offs and design blast plans. When the project gets awarded we supply the MDA rock drill, put you in touch with installers and get your equipment commissioned. Once the job is ready to start Nxburst training is done on-site and includes support starting the work. When you choose Nxburst you get the only 1.4s cartridge that has a shock tube option. Having the ability to add timing to a blast design giving a blaster the ability to execute complex work with conventional blasting tools. When vibration or neighbours are an issue on a blasting job, supplying solutions to alleviate those issues are our specialty. When you look to us for the MDA rock drills, Nxburst™ cartridges and the QuikDraw mine hang-up relief system, you get a supplier and a trusted advisor. We strive to provide you with the solutions

# What's New

you need to make your work easier, more productive, and more profitable. With over 40 years of combined rock excavation and blasting experience, we have seen almost everything. Start the first blast jobs that come across your desk in the new year off right. Give us a call and see how we can provide you with a complete solution, the equipment and products you need, the know-how to get it done and the experience to handle a curve ball when it comes.

## Happy Trails Construction

We are thrilled to welcome Happy Trails Construction to the Nxburst™ family. Building trails through the forest can lead to obstacles, mostly of the rock type. Nxburst will allow them to place trails where they are wanted, not where is easiest. Happy Trails designs and builds trails according to modern principles and best practices resulting in sustainability and maximum user satisfaction (fun).
