

NEWS THIS MONTH

YOUR SOURCE FOR ALL THINGS ROCK-BREAKING

THE LARGER 42MM CARTRIDGES ARE HERE

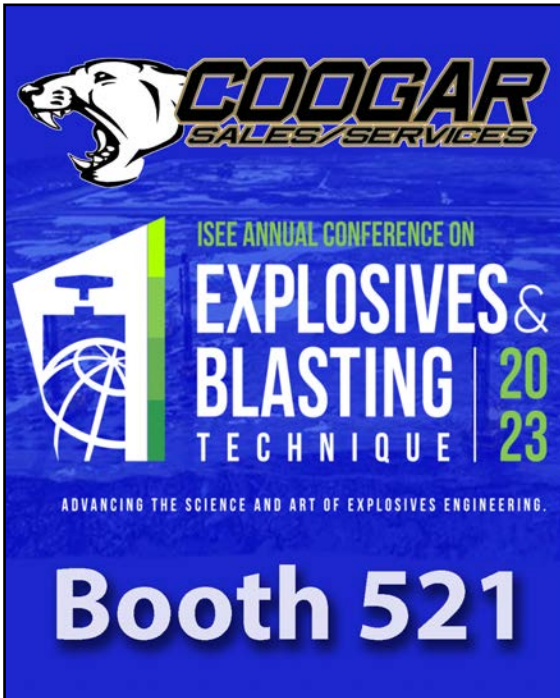

The Nxburst cartridges line is now bigger. The 42mm cartridge range has now been extended to include a 30042, 40042, 50042 and the now largest gram weight available in a 65042. With a

total length of 780 mm or 31" this single cartridge will work in 2.5 - 3 metre or 8 to 10' depth boreholes. These new cartridges will allow you to save money in drilling costs by reducing your hole diameter from 76mm or 3" down to 48mm or 1.75". More drilling feet per hour is always a good thing. The ability to increase the explosive column in a single cartridge also saves roughly 30 percent of the cost as well as elimination of multiple leads out of the hole. We are happy to help you introduce these cartridges to your operations and take advantage of these new benefits

ISEE CONFERENCE IS NOW

It's conference time again, and at Coogar Sales it's not just the warmer weather (It was -38 degrees when we left) but the chance to network that has us excited. Every year we head to the ISEE Conference on Explosives & Blasting Technique to cement our existing relationships and also to form new ones. The explosives business is made up of a small group of suppliers and very knowledgeable end-users. The conference is designed to present technical papers, provided training hours and also showcase the latest products in the industry. With attendees and exhibitors from around the globe, if you are in the rock removal

business, this show is one not to miss. In addition to the valuable information sharing at the conference it also provides a great opportunity for explosive manufacturers and distributors to introduce new products. This year Coogar Sales and Services has the pleasure of introducing North America to new larger Nxburst

cartridges. The 42mm diameter cartridge range now includes 300, 400, 500 and 650 gram charge weights.

BLAST DESIGNS

With spring approaching, we are ready to help with your planning. Give us a call or email and we'll be glad to help
