

NEWS THIS MONTH

YOUR SOURCE FOR ALL THINGS ROCK-BREAKING

GRAND OPENING IN NEW YORK CITY

I know we have talked a lot about the fantastic work done by Skanska, the Liuna local 147 “Sandhogs”, Maurer & Scott and many others involved in the 42nd St. and Lexington Ave. Grand Central Station project but can you blame us? The official opening took place this past week with nothing but praise for all involved. Initial estimates had the underground tunnelling project aimed to be completed in 3 years. The project involved excavating through more than 1’000 tons of hard Manhattan schist.

The MTA chair Janno Lieber and MTA C&D President Jaime Torres-Springer praised the entire team and the innovative rock excavation that was available by using Nxburst.

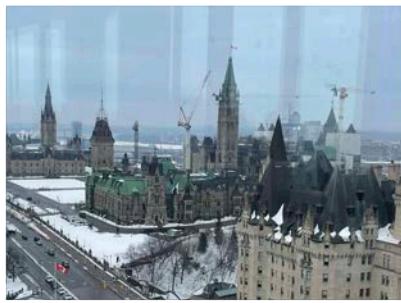

We are happy to have played a role in bringing new means and methods to constructing a strategic tunnel passageway and secondary entry point linking the Lexington Line and the Flushing Line in the heart of Manhattan. Through the hard work of all involved, the project is now open a full year ahead of schedule.

ISEE EASTERN CANADA CHAPTER AGM

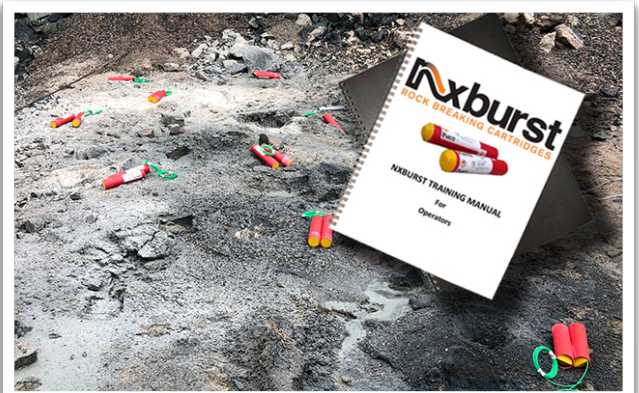

This past week Coogar Sales & Services had the pleasure of attending the ISEE Eastern Canada Chapter AGM in Ottawa, Ontario. The wider ISEE as a whole has always been a great industry association to drive innovation and cooperation amongst its members. Attending the local chapter meetings brings that even closer to home. Although the clouds tried to dampen the Sundowner Social, it was a great event and we can't wait for the next one. If you are in the industry, this is a great association to get involved with and we can't recommend it enough. Thank you to all the members who made this event a great success!

NXBURST TRAINING - COMING SOON

This winter has been one from years gone by, and no sign of stopping. This time last year we were planning our spring Nxburst training sessions. This year however we will have to be a bit more patient in waiting for the snow and cold to loosen its grip. We'll be planning training sessions as soon as we have access to our practical location and will keep you all notified well in advance. Our Nxburst training sessions will give you the knowledge and confidence to tackle your next rock removal project.

We spend a lot of time covering rock-breaking concepts, the methodology behind breaking rock, drill patterns and most importantly the environmental and safety impacts that need to be controlled. You can register for our training at: <https://coogarsales.com/nxburst-training/>
